

### product type designation

### product description

### Fiber optic standard cable

Flexible glass fiber-optic cable, preferred length, preassembled

fiber optic cable (62.5/125), standard cable, splittable, pre-assembled with 4 BFOC connectors, length 2 m.

### Technical Product Detail Page

<https://l.siemens.com/1P6XV1820-5BH20>

### suitability for use

Cable for installation indoors and outdoors

### version of the assembled FO cable

Assembled with four BFOC connectors

### cable designation

AT-V(ZN)YY 2X1 G 62,5/125 OM1

### wire length

2 m

### optical data

#### attenuation factor per length

- at 850 nm / maximum 3 dB/km
- at 1300 nm / maximum 0.8 dB/km

#### bandwidth length product

- at 850 nm 300 GHz·m
- at 1300 nm 800 GHz·m

### mechanical data

#### number of fibers / per FOC core

1

#### number of FO cores / per FOC cable

2

#### version of the FO conductor fiber

Multimode graded-index fiber 62.5/125 µm, OM 1

#### design of the FOC core

Compact core, diameter 900 µm

#### design of the fiber-optic cable

Segmentable outer conductor

#### outer diameter

- of the optical fibers 62.5 µm
- of the optical fiber sheath 125 µm
- of the FOC core sheath 3.5 mm

#### width / of cable sheath

9.8 mm

#### thickness / of cable sheath

6.3 mm

#### material

- of the fiber-optic cable core Quartz glass
- of the optical fiber sheath Quartz glass
- of the FOC core sheath PVC
- of the fiber-optic cable sheath PVC
- of the strain relief Aramid fibers and glass roving

#### color

- of the FOC core sheath gray
- of cable sheath Black

#### bending radius

- with single bend / minimum permissible 80 mm
- with multiple bends / minimum permissible 80 mm

#### tensile load

|                                                                                                                      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |

| security information                                                                                                 | <p>Siemens provides products and solutions with industrial cybersecurity functions that support the secure operation of plants, systems, machines and networks. In order to protect plants, systems, machines and networks against cyber threats, it is necessary to implement – and continuously maintain – a holistic, state-of-the-art industrial cybersecurity concept. Siemens' products and solutions constitute one element of such a concept. Customers are responsible for preventing unauthorized access to their plants, systems, machines and networks. Such systems, machines and components should only be connected to an enterprise network or the internet if and to the extent such a connection is necessary and only when appropriate security measures (e.g. firewalls and/or network segmentation) are in place. For additional information on industrial cybersecurity measures that may be implemented, please visit <a href="http://www.siemens.com/cybersecurity-industry">www.siemens.com/cybersecurity-industry</a>. Siemens' products and solutions undergo continuous development to make them more secure. Siemens strongly recommends that product updates are applied as soon as they are available and that the latest product versions are used. Use of product versions that are no longer supported, and failure to apply the latest updates may increase customer's exposure to cyber threats. To stay informed about product updates, subscribe to the Siemens Industrial Cybersecurity RSS Feed under <a href="https://www.siemens.com/cert">https://www.siemens.com/cert</a>. (V4.7)</p> |
